syn 1 GET, OBTAIN, PROCURE, SECURE, ACQUIRE, GAIN, WIN, EARN *shared meaning element*: to come into possession of GET is both general in meaning and simple and familiar in use. Thus, one may get something by fetching (get a book from the shelf) by extracting (get gold from ore) by receiving (get a present) or by earning (get good wages) OBTAIN is more likely to suggest attainment of something sought, often after expenditure of time and effort (obtain a graduate degree) PROCURE stresses effort employed in obtaining (pursued with unflagging energy his program of building up the armed services and procuring arms for them — W. L. Shirer) SECURE may suggest safe lasting possession or control (safety against infection could be secured by the simple precaution of using safe, potable water — V. G. Heiser) or the obtaining of what is hard to come by (secure bookings for a new singer) ACQUIRE often suggests addition to what is already possessed (acquire a taste for olives) GAIN adds to obtain the notion of struggle or competition and often implies material worth to the thing obtained (worked hard to gain an education) WIN may differ from gain in suggesting the influence of favoring factors or circumstances (her excellent performance won her an award) EARN implies a correspondence between one's effort and what one gains thereby (his behavior earned him general condemnation)

syn IDEA, CONCEPT, CONCEPTION, THOUGHT, NOTION, IMPRESSION
shared meaning element: what exists in the mind as a representation (as of something comprehended) or as a formulation (as of a plan) IDEA is equally applicable to a mental image or formulation of something seen or known or imagined, to a pure abstraction, or to something assumed or vaguely sensed (that's not my *idea* of a good time) (try to get an *idea* of the complexity of the problem) CONCEPT in precise use applies to a generic idea conceived by the mind after acquaintance with instances of a category (the child as he grows develops such concepts as "chair", "dog", and "house") but in frequent, if sometimes criticized use concept is applicable to any formulated and widely accepted idea of what a thing should be (we must expand the concept of conservation to meet the imperious problems of the new age — J. F. Kennedy) CONCEPTION, though often interchangeable with concept in the latter's more general use, can distinctively stress the process of imagining and formulating (too often a writer's conception exceeds his capacity for execution) THOUGHT is likely to suggest the result of reflection, meditation, or reasoning rather than of imagining (a child's thought about God) NOTION can apply to a vague, tentative, or chance idea (most of us retain the notion that all technical change is progress, is necessarily good — R. M. Hutchins) but in precise use it can come close to concept in suggesting a general or universal idea (arriving at the notion of law — Irving Babbitt) or to conception in denoting the meaning content assigned by the mind to a term (they have no adequate notion of what we mean by causation — Edward Sapir) IMPRESSION usually implies the presence of external stimulation that gives rise to an often vague idea (I had an impression that the door opened softly)
